

Different Colors

Natural Color

Natural color of Nylon product with different appearance.

Acceptable

Comment:

Color of housings may range from clear to green or yellow due to hygroscopic nature of resin. However it doesn't affect the Form, Fit and Function of the product as guaranteed by resin supplier and endorsed by our validation. All the critical items have been tested such as Contact Retention Force, Insulation Resistance, Dielectric Withstanding Voltage, Accelerated Aging, Electrical Requirement, Mechanical requirement, Durability and Humidity, the result show that these items meet TE specification.
